INTERN MUNICH ENGINE (M/F/D)*

FOR THE DIVISION REINSURANCE DEVELOPMENT

Reinsurance Development (RID) is a central division of Munich Re that combines all functions of strategy development and implementation, organizational design, corporate client management, data analytics, innovation management and new client services, like IoT and Risk Management. The project Munich Engine is a strategic innovation initiative of Munich Re which operates from two locations, Munich and New York City. Its goal is to digitize underwriting expertise and create an advanced next generation risk assessment engine (the "Munich Engine"). The Munich Engine will lead the path for a fully digitally business model in insurance and we are looking for a motivated, proactive and inspired intern to support the project team. Your placement will be beginning from February 2019 for a minimum of three months, part time during the semester is possible.

YOUR JOB:
- Support actuary in developing actuarial ratings for primary insurance products for US market
- Support product development team in finding correlations between target variables and other attributes and subsequently build a mathematical model
- Creating and running test cases for actuarial portion of Munich Engine software solution
- Support product managers in their day to day work

YOUR PROFILE:
- Master student in mathematics, data science, statistics or related fields with excellent grades
- Specialization in actuarial science and interest in insurance related topics are a big plus
- Previous experience in insurance or financial services is a plus
- Very good knowledge of MS Excel and sound knowledge of at least one programming language (preferably R, Python)
- “Can do” approach & ability to learn quickly
- Excellent command of written and spoken English

Munich Re is one of the world’s leading reinsurance companies with more than 11,000 employees at over 50 locations around the globe. We are working on topics today that will concern the whole of society tomorrow, whether that be climate change, major construction projects, gene technology or space travel. We find solutions to these challenges through a network of highly qualified professionals who anticipate risks, work on tailor-made solutions and expertly advise our clients. If you want to help shape the future as part of one of our teams, we look forward to hearing from you. Please click on the link to apply online.
